

CHALK CREAM

Essential to the practice of gymnastics, Chalk Cream has all the benefits of usual chalk blocks and powder, has excellent grip while reducing emission of particles.

Cream Chalk has finesse, is porous in texture and provides optimal covering and ultimate grip on Gymnasts hands with just a small quantity. Once the alcohol evaporates the cream changes texture in a few seconds giving the feel of standard block or powder and confidence to perform all Gymnastic moves.

Turns into standard chalk in few seconds

Just a small quantity

Ultimate grip on Gymnasts hands

99,7%
EXTRA PURE

**Food grade chalk
with a purity rate of 99.7%.**

*Chalk is not toxic by inhalation or
ingestion.*

**Features the same properties as
hydroalcoholic sanitising gels.**

*High purity isopropyl alcohol which
meets the requirements of the
pharmacopoeia.*

Up to
250
applications

**A 250 ml bottle allows between
200 and 250 applications**

Non-perishable product

ADVICE FOR USE

**This method of application causes no
dust or loss to the ground.**

In order to mix the solution we recommend shaking the bottle well before use. Do not add water or any other solutions as this will affect the grip and performance of the Cream Chalk.
